

Product/trade name(s)	Zinc Aluminium Alloys (CGG, Galva5, AX (A5, A10, A15), Galfan)	
Type of product	Preparation	
Substance(s) in product	Substance 1	Substance 2
Substance(s) name	Zinc	Aluminium
CAS number	7440-66-6	7429-90-5
EINECS number	231-175-3	231-072-3
Nyrstar's role(s)		
Regarding Preparation:	Manufacturer	
Regarding each substance:	Manufacturer	Downstream User Importer into EU
Tonnage band (manufactured+imported)	>1000t	>1000t
Pre-registration		
Status pre-registration	completed	completed
_ Pre-registration nbr Nyrstar Belgium SA/NV	05-2114324962-48-0000	05-2114349590-48-0000
_ Pre-registration nbr Nyrstar Budel BV	05-2114640143-61-0000	05-2114684909-25-0000
_ Pre-registration nbr Nyrstar France SAS	05-2114646551-50-0000	none or de-activated
_ Pre-registration nbr Nyrstar Germany GmbH	none or de-activated	none or de-activated
_ Pre-registration nbr GM Metal SAS	05-2114676407-39-0000	05-2114676520-49-0000
Registration		
Need to register	yes	yes
Intention to register	yes	yes
Anticipated deadline for the registration	3,5 years 01/12/2010	3,5 years 01/12/2010
Hazard information		
Substance(s) likely to be classified as		
CMR 1 or 2 under REACH	no	no
PBT or vPvB	no	no
R50/53	no	no
Identified as SVHC on the candidate list agreed by the ECHA Member State Committee in Oct.2008?	no	no
Exposure Scenarios for Preparation		
Input needed from customer to develop Exposure Scenarios in Chemical Safety Assessments	Yes, to be further specified within Zinc Consortium (www.reach-zinc.eu)	
Details composition and shape	See technical datasheets on website www.nyrstar.com
